SPECTROCHIMICA ACTA
PART B: ATOMIC SPECTROSCOPY
Including Spectrochimica Acta Electronica

CONTENTS OF VOLUME 48B 1993

No. 1

P. W. J. M. Boumans	1	Editorial
	5	Curriculum vitae: Professor Paul B. Farnsworth
Zhongwen Liang, R. F. Lonardo and R. G. Michel	7	Determination of tellurium and antimony in nickel alloys by laser excited atomic fluorescence spectrometry in a graphite furnace
H. Nickel, Z. Zadgorska and G. Wolff	25	Optimization of electrothermal vaporization of impurity elements in ceramic powders using inductively coupled plasma atomic emission spectroscopy
D. M. P. Milton and R. C. Hutton	39	Investigations into the suitability of using a secondary cathode to analyse glass using glow discharge mass spectrometry
J. Galban, E. Marcos, J. Lamana and J. R. Castillo	53	Evaluation of a method for arsenic(III) and antimony(III) determination by vapour phase molecular absorption spectrometry using graphite furnace volatilization
A. Ülgen, M. Doğan, A. Gökmen and S. Yalçin	65	Background suppression of Ar lines in glow discharge atomic emission spectrometry by a lock-in amplifier and Kalman filter deconvolution
R. W. Fonseca, J. McNally and J. A. Holcombe	79	Mechanisms of vaporization for silver and gold using electrothermal atomization
L. C. Azeredo, R. E. Sturgeon and A. J. Curtius	91	Determination of trace metals in seawater by graphite furnace atomic absorption following on-line separation and preconcentration
A. Scheeline and P. B. Farnsworth	99	News on Fundamental Reference Data

TOTAL-REFLECTION X-RAY FLUORESCENCE SPECTROMETRY

Proceedings of the Fourth Workshop on Total-Reflection X-Ray Fluorescence (TXRF)

A. Prange	107	Preface—4th TXRF-Workshop at Geesthacht, F.R.G.
G. Tölg and R. Klockenkämper	111	The role of total-reflection X-ray fluorescence in atomic spectroscopy
T. Horiuchi	129	Initial idea to use optical flats for X-ray fluorescence analysis and recent applications to diffraction studies
T. Horiuchi and K. Matsushige	137	Total-reflection X-ray diffractometry and its applications to evaporated organic thin films
P. Wobrauschek, P. Kregsamer, W. Ladisich, R. Rieder and C. Streli	143	Total-reflection X-ray fluorescence analysis using special X-ray sources
A. Prange, K. Kramer and U. Reus	153	Boron nitride sample carriers for total-reflection X-ray fluorescence
C. Streli, H. Aiginger and P. Wobrauschek	163	Light element analysis with a new spectrometer for total-reflection X-ray fluorescence
D. Schmidt, W. Gerwinski and I. Radke	171	Trace metal determinations by total-reflection X-ray fluorescence analysis in the open Atlantic Ocean
M. Haarich, D. Schmidt, P. Freimann and A. Jacobsen	183	North Sea research projects ZISCH and PRISMA: application of total-reflection X-ray spectrometry in sea-water analysis
P. Freimann, D. Schmidt and A. Neubauer-Ziebarth	193	Reference materials for quality assurance in sea-water analysis: performance of total-reflection X-ray fluorescence in the intercomparison and certification stages
M. Schirmacher, P. Freimann, D. Schmidt and G. Dahlmann	199	Trace metal determination by total-reflection X-ray fluorescence (TXRF) for the differentiation between pure fuel oil (bunker oil) and waste oil (sludge) in maritime shipping legal cases
A. Prange, H. Böddeker and K. Kramer	207	Determination of trace elements in river-water using total-reflection X-ray fluorescence

G. A. Battiston, R. Gerbasi, S. Degetto and G. Sbrignadello 217 Heavy metal speciation in coastal sediments using total-reflection X-ray fluorescence spectrometry

R. Pepelnik, B. Erbslöh, W. Michaelis and A. Prange 223 Determination of trace element deposition into a forest ecosystem using total-reflection X-ray fluorescence

J. Dixkens, H. Fissan and T. Dose 231 A new particle sampling technique for direct analysis using total-reflection X-ray fluorescence spectrometry

R. Klockenkämper, A. von Bohlen, L. Moens and W. Devos 239 Analytical characterization of artists' pigments used in old and modern paintings by total-reflection X-ray fluorescence

N. Ojeda, E. D. Greaves, J. Alvarado and L. Sajo-Bohus 247 Determination of V, Fe, Ni and S in petroleum crude oil by total-reflection X-ray fluorescence

T. Sinner, P. Hoffmann and H. M. Ortner 255 Determination of Fe(II) and Fe(III) in small samples by microbore ion chromatography and photometric, atomic absorption spectrometry and total-reflection X-ray fluorescence detection

C. Freiburg, W. Krumpen and U. Troppenz 263 Determinations of Ce, Eu and Tb in the electroluminescent materials Gd_2O_2S and La_2O_2S by total-reflection X-ray spectrometry

W. Berneike 269 Basic features of total-reflection X-ray fluorescence analysis on silicon wafers

W. W. van den Hoogenhof and D. K. G. de Boer 277 Glancing-incidence X-ray analysis

J. Knoth, R. Bormann, R. Gutschke, C. Michaelsen and H. Schwenke 285 Examination of layered structures by total-reflection X-ray fluorescence analysis

H. Schwenke, R. Bormann, J. Knoth and A. Prange 293 Some potential developments for trace element and surface analysis using a grazing incident X-ray beam
